## EDUCATION

---

### B.E. Computer Science and Engineering

Bangalore Institute of Technology

CGPA: 9.34/10.0

2020 – 2024

Bangalore, India

## PROJECTS

---

### Weather App [🔗](#)

- Uses OpenWeatherMap API to intelligently tell the weather conditions of the searched location.
- Utilised HTML, CSS and JAVASCRIPT in the website creation.
- Tells information such as current temperature, high-low temperature and weather condition as soon as the user enters the city name and presses enter.

### Tindog- tinder for dogs [🔗](#)

- Utilised HTML CSS and Bootstrap to create a front page depicting the layout of tinder made actually for dogs instead of humans.
- Completely responsive website that adjusts according to the size of the screen of the user whether it is a laptop, tablet or smartphone.
- Included slideshow feature showing the reviews of the users and also a pricing plan

### E commerce [🔗](#)

- A full-stack e-commerce web application made using **React, MongoDB and Nodejs**.
- Functionalities include login, register, add to cart, checkout. Filter and select products based on size and color.
